Description

This award has a 3-D picture floating within the crystal. It is a very unique effect. The process includes using our laser to precisely pierce a hole within the crystal at a specific depth. Doing this hundreds and thousands

of times creates an image that is both 3D and holographic. This 3D custom crystal award features the image of basketball players. As you see in the video, they appear vividly. The crystal is a solid block and can be etched and engraved with various images and text.
