Description

This service award is custom shaped and molded to appear just like one of their tractors in the field out in front of silos. We created this design in two different sizes, with the largest being 14 tall and weighing just

over 10lbs. A smaller one weighs about 7 lbs. They are awesome.

The crushed stone has been molded to provide the custom shape, and the piece is one solid, continuous heavy stone. Superior paving chose the natural stone look, and we can create stone pieces like this in many colors and stone effects.
